The cables, luminaire, power supply and other parts should be checked regularly for damage.

In case of damage, the product must not be used.

Important information! Keep these instructions for future reference

Warning

This product's light source consists of non-replaceable light bulbs (LED).

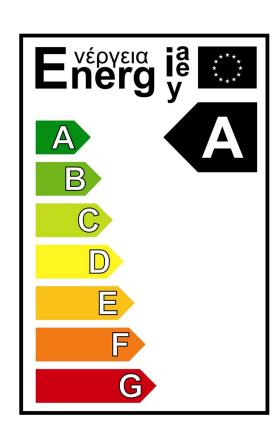

The product must not be disassembled.

Do not bring into contact with water.

Cleaning

Use a damp cloth.

Avoid using strong detergents.

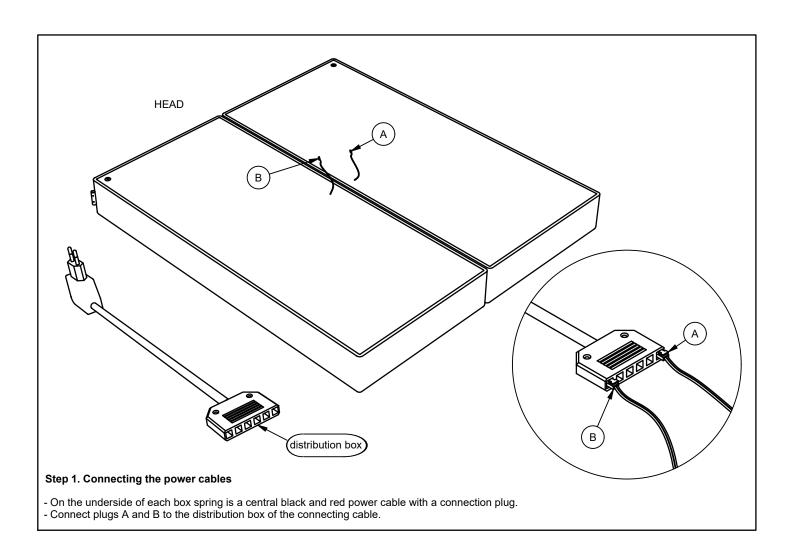

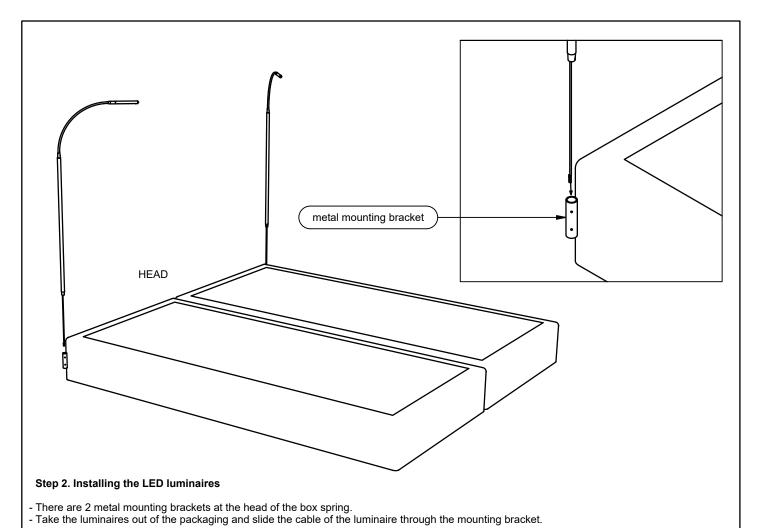

## **ASSEMBLY INSTRUCTIONS**

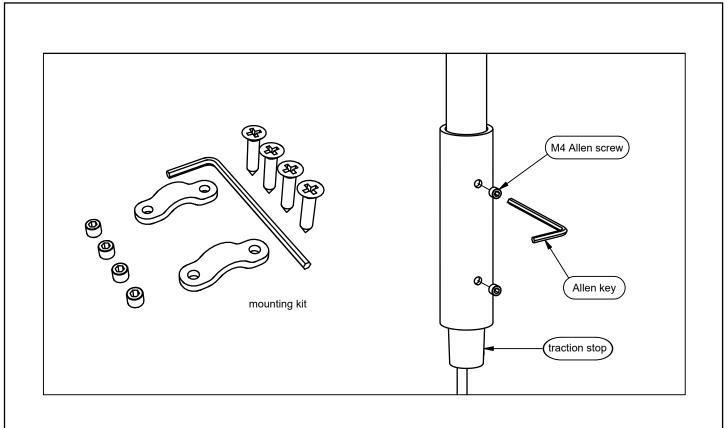

# LED Reading Lamp

version: June 2020

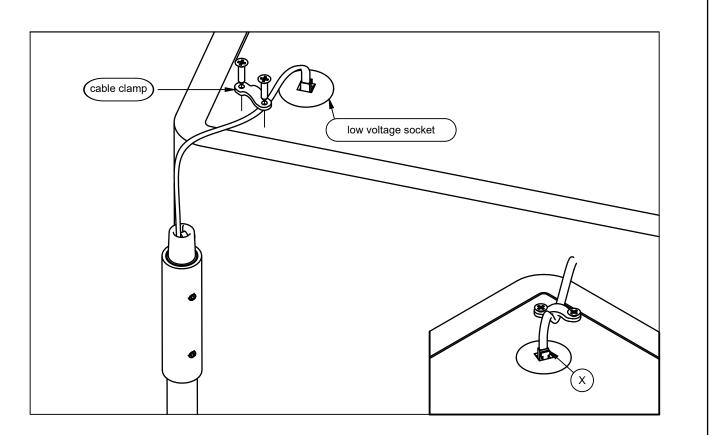

#### Step 3. Fastening the luminaires

- In the mounting kit, you will find 4x M4 Allen screws and one Allen key.
- With these screws, you can fasten the luminaires to the mounting bracket.
  Make sure that the black traction stop is just below the mounting bracket.

### Step 4. Connecting the luminaires

- A low voltage socket has been installed at the bottom of the box spring.
   Using the plug, connect the luminaire to this low voltage socket.
   After connecting, secure the cable using the cable clamp supplied.
   If you want to disconnect it, press the flat plate (x) all the way in before pulling out of the connector.
